LOST ACCESS TO PROVIDERS

Dentists
Marriage Therapists
Nurse Midwives
Nurse Practitioners
Psychiatric Nurses
Optometrists
Pastoral Counselors
Professional Counselors
Psychologists
Social Workers

RATING

Maine prohibits insurers from charging higher premiums to small businesses based on gender, health status, and claims experience. There are limits regarding how much insurers may vary premiums based on age, geography and industry (1:5 band) and additional adjustments are allowed for family composition, smoking, wellness programs, and group size. Maine's protections would be lost under S. 1955, which implements a federal ceiling based on an outdated National Association of Insurance Commissioners (NAIC) model law.
